The single word which can describe Northstar's VEGA series is VERSATILITY. Northstar Vegas, up to and including 4.2, have lightweight tender features offering useful storage and seating arrangements on a dry riding hull. Vega 4.8 and up transforms into a sports/utility RIB range which allow users to customize their RIBs for fishing and other water sports. Wide beams, extra large deck storage spaces, functional seating are some of standard features on VEGAs while options like recirculating livewells, bow mounts for trolling motors and T-tops are there to customize them. Like all Northstars, VEGAs are made exclusively with CSM (Hypalon) tubes for added durability.
